INFORMATION TECHNOLOGY LEADER / STRATEGIST / CHANGE DRIVER

Providing the strategic and creative leadership that positions companies for game-changing success.

Over 10 years of experience that includes the management of complex, multimillion-dollar IT projects. Multi-industry successes include projects in Transportation & Logistics, Software, and Telecommunications, with a consistent record of high customer satisfaction. Skilled in supervising, training, mentoring, and evaluating team members from diverse backgrounds. MBA degree.

PROFESSIONAL OVERVIEW

- Excel in managing the full scope of IT projects and aligning client's goals with the best technology solutions.
- Provide companies with a competitive edge through analysis and introduction of new technologies.
- Background includes IT security, software enhancement, SOX/regulatory compliance, and process optimization.
- Highly skilled in building strong, sustainable relationships with team members, stakeholders, and top executives.
- Recognized throughout career for exemplary performance, including formal "Encore" awards from KPMG.

Key Skill Areas: Information Technology Team Leadership ♦ Process Improvement ♦ Innovative Solutions ♦ IT Governance ♦ Strategic Business Solutions ♦ Project & Program Management ♦ Mentorship & Coaching ♦ Collaborative Relationship Management ♦ System & Business Analysis

PROFESSIONAL EXPERIENCE

JABIAN CONSULTING – Atlanta, GA – 2011-Present

Manager

Led series of transformational IT projects involving mid-market companies. Supervise 2-3 direct and 12-20 indirect reports, working with teams of business analysts and SMEs. Interact with clients to address requirements, build customized solutions, and address/resolve issues. Frequently serve as a Program Manager for clients, maintaining higher-level roadmap in terms of scope, budget, problem-solving, and innovative solutions. Provide construction feedback to team members in order to influence top performance.

KEY CONTRIBUTIONS & ACHIEVEMENTS:

- **Integrated suite of product and software enhancements** within a large global document management and storage company as a Program Manager and Business Analyst. Worked with partners and stakeholders on requirements analysis, created strategic roadmap of projects to address compliance/reporting gaps, and represented the customer within the Technology organization.
 - Collaborated with Business Analysis to implement new methodology for gathering functional requirements, ensuring 100% fulfillment of business goals on technology solutions.
- **Developed and executed series of executive scorecards** for a mid-market healthcare service provider; enabled implementation teams as well as senior management teams to report, track, and manage schedule, budget, and resources of implementation programs more effectively. Primary source of effectiveness resulted from introduction of earned value management and productivity metrics.
 - Worked jointly with stakeholders and executives from Technology Delivery and Customer Experience organizations on managing scorecard adoption/change into daily processes.
- **Worked as a Program Manager for a large telecommunications company.** Implemented program involving multiple technical upgrades to financial applications used by Corporate Accounting, Tax, and Finance teams. Directed full software development lifecycle, including scope, budget, schedule, and resources. Achieved stakeholder satisfaction and project delivery objectives.
- **Maintained active engagement in recruiting and interviewing** that led to the procurement of top talent for Jabian Consulting. Mentored and coached new hires and colleagues to strengthen individual expertise and experience as well as team capabilities.

PROFESSIONAL EXPERIENCE, continued

KPMG, LLP - Atlanta, GA & New York, NY - 2006-2011

Senior Associate, IT Advisory Services, 2010-2011

Associate, IT Advisory Services, 2006-2009

Oversaw full lifecycle of client-facing projects involving multiple Fortune 500 companies, with primary areas including IT Governance & Attestation, Sarbanes-Oxley Program Implementation, IT Support for Financial Audit Objectives, and Information Technology Consulting.

Led team of 2-3 associates/direct reports at any given time; conducted performance reviews, mentored specific team members, and oversaw professional development of employees to improve employee performance. Worked with client and technical resources to understand system set-up and configuration. Managed budget, resource planning, and progress tracking/reporting to stakeholders.

KEY CONTRIBUTIONS & ACHIEVEMENTS:

- **IT Advisory Project Management** - Executed projects that included Disaster Recovery and Business Continuity Assessments, Post-Implementation Reviews for SAP & PeopleSoft Systems, and Network Security Assessments. Supported financial statement audits and performed client assessments to determine areas for improvement, including risk management, gap closure, workflow analysis, and data/security/user rights integrity.
- **Sarbanes-Oxley/Internal Controls** - Advised clients on SOX internal controls standards and best practices to meet IT governance and compliance goals. Improved process security and closed gaps as a result.
- **New Business Development** - Contributed to proposal writing and research, working with senior management on RFP that included proposal of KPMG's projected contributions, financial estimates, available resources, and industry research. Focused on relationship management and collaborated closely with clients to create innovative solutions for their top-priority business objectives.
- **Performance Recognition** - Earned multiple "Encore" awards for "Outstanding Client Service" from both employer and client companies (nominated by engagement managers and team directors). Recognized for above-and-beyond efforts, including providing additional work that benefitted the client.

*** Prior position as Systems Administrator, IT & Operations Support with Lehigh University Transportation & Parking Services. Provided technical assistance and support for managing daily transportation activities and technology requirements, including systems administration, end-user support, and project implementations.*
