Professional Summary

As a delivery-focused Project Manager for almost 10+ years, I have managed both direct and virtual teams in creating, developing, implementing and maintaining numerous IT solutions from end to end. I have played a key role in the technical delivery of integrated solutions, deployed in most admired companies throughout the world. My role has been instrumental in business transformation, implementation of Content, Information Management, Data Quality, technical presales, contract management, service-level agreements, ongoing account management and strategic business development. I have a proven track record of delivery, most often working on simultaneous and overlapping projects. I have managed local and remote development teams, fixed-price work packages, and third-party development and integration projects.

Achievements

- Has successfully completed consulting engagements, Delivered End to End Implementation, Development and Application support projects with the technology including EMC Documentum, Oracle WebCenter, IBM FileNet, MS SharePoint technology projects and Java J2EE.
- Responsible for creating Center of Excellence and Competency building activities in Oracle WebCenter (FatWire), EpiServer, SDL Tridion, Vignette, & Interwoven. also alliance management for WCM products
- Experience with various domains including Oil and Gas (Chevron), Media (Apple), Manufacturing (GE, Honeywell,), Auto (Mercedes, Caterpillar), Governance (PUB -SG, Botswana), Telecom (KPN), Banking (RBC, CITCO) leisure hospitality industry (MHRIL).
- Six plus years of onsite experience in implementing Full Life Cycle projects in the United States, Singapore, Canada and India.
- Completed the Certificate of Global Business Leadership program from Harvard Business School Publishing, U21 Global and Satyam
